

Bookeroo Sprint Planning Notes

Team: Folie a Deux

Sprint: Sprint number 2

Date: 15/9/21

Attended:

Scrum Master: Mac Arriero s3812132

Product Owner: Dale (Tutor)

Development team:

Abdulrahman	s3763122
Mac	s3812132
Jehan	s3720135
Rohan	s3843078
Adi	s3844647

1. Goal

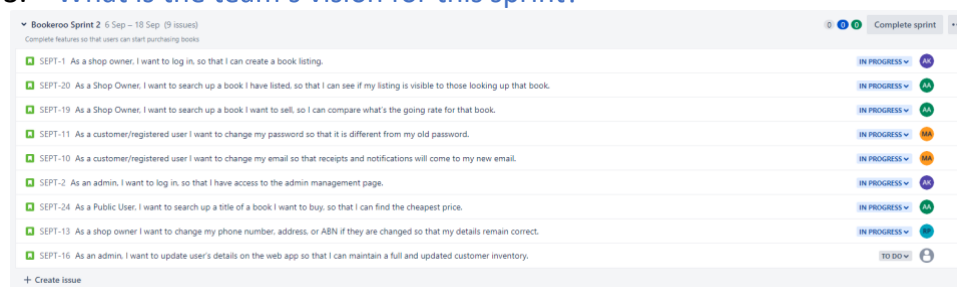

Complete features:

- Create Book Listing Back-End - Mac
- Create Book Listing Front-End - Abdulrahman
- Book Details page – Rohan
- Display user account information - Rohan
- Homepage - Jehan
- CSS clean-up & About page - Adi

2. Duration of the sprint

2 weeks

3. What is the team's vision for this sprint?

The above screenshot represents the user stories that we will tackle for sprint 2. Due to complications and overestimating the team's capabilities, we have decided to tackle less user stories for this sprint. There were some user stories in sprint 1 that was blocked by user stories in the backlog where these user stories were rejected and added alongside the user stories blocking them. At this stage, it will be easier for the team to tackle high priority tasks that will contribute to a shippable product.

4. Estimation in story points

Estimation guide – 16 hours => 20 story points

The user stories code reflects their number on our Jira backlog as shown in a screenshot in the screenshot above.

SEPT-1 => 5 story points
SEPT-20 => 3 story points
SEPT-19 => 5 story points
SEPT-11 => 5 story points
SEPT10 => 3 story points
SEPT-2 => 5 story points
SEPT-24 => 5 story points
SEPT-13 => 3 story points
SEPT-16 => 5 story points

These estimations are made after revising the team capabilities and reviewing our current progress. These user stories will complement the current progress and will help create a potentially deployable product.
